### **Contact the Accommodation and Accessibility Staff**

In order for students to receive academic accommodations they must register with accessibility services. The accessibility services department is located in the Student Success Centre. We are responsible for arranging academic accommodations for students with disabilities. The student will meet with a SSC staff member and together they will identify appropriate accommodations that are based on:

- ❖ the functional limitations associated with the student's disability in the academic environment;
- ❖ the student's academic program, or course and its essential requirement;; and
- ❖ any previous accommodations you may have received at the secondary or post-secondary level
