

10 Study Tips for Math Class

Math class can be an enjoyable if you are willing to put in a little effort beforehand. Planning goes a long way.

Do homework daily

Doing homework on a daily basis is essential to succeeding in math class. Take notes in class and use them daily. If you do your homework regularly you won't fall behind when a problem occurs and it will be easier to study for a test. Make a file where you can keep all your notes handy for future reference.

Don't be afraid to ask help

Don't be afraid or too proud to ask for help. Your teacher will gladly help you and it will give you the tools to conquer the problem. Sometimes it is easier to understand something if someone else just shows you how, instead of battling endlessly yourself. It will save you a lot of time in the long run.

Use the handbook

The examples and notes in the book will shed some light to the situation you need help with. Think logical. Don't over complicate problems. Logical thinking will help you establish a basic way of solving problems.

Do sample tests

Take time to do sample tests. This way you can identify problem areas quickly and eliminate them before its time for the real test. Retest yourself regularly. This way you will be able to establish your weak points.

Form a study group

Form a study group that can meet at least once a week where you can discuss problems or any difficulties and help each other. Compare answers with one another. See the different way people can get a solution to a problem.

Tackle problems head on

Work through problem areas more than once until you start to understand them. It is a better solution to know how the problem area works than to just memorizing the solution. Don't leave
